EDUCATION

Global Academy of Technology

Bengaluru, India

Bachelor of Engineering – Information Science & Engineering, CGPA: 8.3/10

Aug 2023 – Jul 2027

Deeksha PU College

Bengaluru, India

Pre-University Education (PCMC), Percentage: 86%

EXPERIENCE

Full Stack Development Intern – Code Morpfix

July 2026 – Present

- Shipped 3 production features end-to-end covering authentication, form validation, and database-driven workflows
- Built secure application workflows with role-based access and CRUD operations across the stack
- Delivered responsive, production-ready UI features including search/filtering and dashboards
- Collaborated using Git/GitHub with structured, meaningful commit history
- Currently working on app development for the CMX Internship Portal, gaining full-stack mobile/app development experience

Freelance Web Developer – Lucid Arena

January 2026

- Independently designed and delivered a full business website for a gaming/entertainment venue, managing the complete lifecycle from requirements to deployment
- Built a live booking workflow for service exploration, availability checks, and enquiry submission
- Delivered 5+ responsive pages (services, pricing, gallery, events, contact) aligned to client requirements

Web Development Intern – Adysis Technologies

Aug 2025 – Oct 2025

- Built a sales/marketplace platform addressing the problem that many local artisans and handicraft makers lack an online presence, limiting their market reach and income
- Debugged and resolved application issues to improve performance and reliability
- Collaborated with the development team on responsive, interactive UI components

PROJECTS

Priorit – Real-Time Project Management Web App

React.js, Node.js, Express.js, MongoDB, Socket.IO, Resend, Tailwind CSS

- Built and tested a full-stack collaborative workspace platform with 5 users, supporting Kanban-based task management and workspace access requests
- Implemented real-time sync via Socket.IO so task updates auto-refresh across all active users within seconds
- Built JWT-based authentication with Gmail email verification and role-based access control (admin/member/viewer)

CartEye – Smart Shopping Cart

IoT + Web Integration, ESP32, Firebase

- Built an IoT smart cart using ESP32 with load cells and ultrasonic sensors for automatic item detection
- Achieved real-time weight-to-product matching against a pre-registered product database, syncing to Firebase within 30 seconds
- Built a web app with live item quantity/pricing and QR-code-based checkout with payment confirmation

MedFlow WebApp – Hospital Patient Flow System

HTML, CSS, JavaScript, Web Speech API

- Designed a bilingual (English/Kannada) hospital flow system supporting multiple departments (4+, extensible) and multiple doctors

- Built a priority-based patient queue where doctors trigger sequential patient calls via an active/ready status toggle
- Added Web Speech API voice guidance to support patients who cannot read or type, improving accessibility

TECHNICAL SKILLS

Languages: Java, C++, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, Tailwind CSS, Socket.IO

Databases: MongoDB Atlas, Firebase Realtime DB

Tools & Platforms: Git, GitHub, VS Code, Eclipse, Vercel, Render, Resend, Netlify

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, REST API Design, JWT Authentication, MERN Stack

CERTIFICATIONS

- Tata GenAI Data Analytics Simulation – Forage
- Artificial Intelligence – Infosys Springboard
- Problem Solving (Basic/Intermediate) – LeetCode
- Oracle Certified Foundations Associate: Java
- AWS Certified Cloud Practitioner

LEADERSHIP & ACHIEVEMENTS

- Co-Convenor – Media Team, VTU Fest 2025 & 2026: Managed social media and cross-team collaboration
- Hackathons: TECHNOCOGNITION'25 (36-hour protothon), HackBites 3.0 (24-hour hackathon)
