

Shreya B Saboji

Software Developer | Full Stack | Android | AI/ML

Bengaluru, Karnataka, India | +91 8197689526 | shreyabsaboji@gmail.com | linkedin.com/in/shreya-saboji | github.com/shreyacode11 | shreyacode11.github.io

PROFESSIONAL SUMMARY

Final-year Information Science & Engineering student (CGPA 8.3/10) and full-stack developer with hands-on experience in Java, Kotlin, Python, JavaScript, Spring Boot, React, Node.js, Android and Machine Learning. Built and tested 3 production-style systems (REST APIs, real-time apps, AI/ML), set up CI/CD pipelines with Jenkins and GitHub Actions, published 1 peer-reviewed paper and solved 200+ DSA problems. Seeking a software development, AI/ML or full-stack developer role or internship.

TECHNICAL SKILLS

Languages: Java, Python, Kotlin, JavaScript, C++, SQL, MATLAB (basic); Object-Oriented Programming (OOP); Data Structures & Algorithms
Backend & APIs: Spring Boot, Node.js, Flask, REST APIs, JWT, OAuth, Socket.IO (real-time), Role-Based Authorization, System Design
Frontend & Mobile: React.js, Android, Jetpack Compose, Material Design, HTML/CSS, UI/UX
Databases: MySQL, MongoDB, SQLite, Firebase Realtime Database
AI/ML: Machine Learning, scikit-learn, YOLO (Ultralytics), OpenCV, Computer Vision, pandas, NumPy, Model Training & Evaluation
DevOps & CI/CD: Git, GitHub, Jenkins, GitHub Actions (automated build & test), Vercel, Render
Testing & Tools: Software Testing (functional, API, end-to-end), pytest, Postman, Jira (Agile), Android Studio, VS Code, Overleaf (LaTeX)
Soft Skills: Problem-Solving, Collaboration, Communication (Written & Spoken), Documentation, Proactive Learning

EXPERIENCE

- Full Stack Android App Development Intern** July 2026 – Present
Code Morphix Bengaluru
- Engineered a full-stack internship management platform with 4 role-based workflows (Intern, Mentor, HR, Admin), including QR attendance with geolocation validation, task management, evaluations, leaderboards and certifications.
 - Designed and integrated 12+ REST APIs (Spring Boot) with JWT authentication and role-based authorization; validated positive, negative and access-control scenarios using Postman.
 - Optimized task-tracking workflow, cutting processing time from 15 min to under 3 min (80% faster); built Android features in Kotlin, Jetpack Compose and Material Design.
 - Set up a CI/CD pipeline with Git and GitHub Actions to automate build and test on every push; tracked tasks in Jira.
 - Performed functional and end-to-end testing across 4 user roles and prepared Play Store launch documentation (test documentation, Terms & Conditions, Privacy Policy, user manuals).
 - Skills applied:** Java, Kotlin, Spring Boot, REST APIs, JWT, Jetpack Compose, CI/CD, Software Testing, Jira, Git
- Freelance Web Developer** Jan 2026 – Feb 2026
Lucid Arena Bengaluru
- Designed and delivered a responsive business website with a live booking workflow; handled 10+ bookings in the first month of launch.
 - Skills applied:** JavaScript, Responsive Web Design, Requirement Gathering, Client Communication

PROJECTS

- CRISISINTEL | AI/ML Disaster Prediction & Rescue Management Platform** 2026
- Built an AI/ML Python (Flask, SQLite) platform with 2 role-based portals (Admin, Public) for disaster prediction and rescue coordination; integrated YOLO (injured-person detection in drone frames), Gemini API and Telegram alerts.
 - Compared 3 classifiers (Random Forest, SVM, Logistic Regression) for flood, cyclone and earthquake prediction: 91.9% test accuracy on earthquake, ~100% on flood (28,881 test samples) and cyclone.
 - Wrote pytest tests for the 3 models and a Jenkins CI pipeline that runs them and builds accuracy reports on every push.
 - Skills applied:** Python, Flask, scikit-learn, Machine Learning, Computer Vision (YOLO), pytest, CI/CD (Jenkins), Git
- PRIORIT | Real-Time Project Management Web App** Mar 2026 – Apr 2026
- Built a full-stack collaborative platform (React, Node.js, MongoDB) with Kanban tasks and role-based permissions, tested with 10–15 concurrent users; Socket.IO real-time sync delivered updates in 1–2 seconds.
 - Added JWT authentication and Gmail email verification for 10+ test accounts; tested auth and sync flows with Postman; deployed on Vercel and Render.
 - Skills applied:** React, Node.js, MongoDB, Socket.IO, JWT, REST APIs, Git, Deployment

PUBLICATIONS

A Survey on AI-Based Disaster Prediction and Intelligent Rescue Management System, Journal of Artificial Intelligence and Information Management (JAIIM), Theta Publishers, Vol. 1, Issue 1, 2026 (peer-reviewed). Written in LaTeX using Overleaf.

EDUCATION

Global Academy of Technology (VTU) 4th Year (7th Sem)
B.E. Information Science & Engineering CGPA 8.3/10
12th (PUC): Deeksha PU College, 2023, 86% | **10th (ICSE):** New Cambridge English School, 2021, 91%

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Java (Basic) – HackerRank (2026); Back End Development and APIs – freeCodeCamp (2026); Front End Development Libraries, JavaScript Algorithms & Data Structures – freeCodeCamp (2025); SQL (Basic) – HackerRank (2025); Tata GenAI Data Analytics Simulation – Forage (2025); Artificial Intelligence – Infosys Springboard (2024); MATLAB.

Problem Solving: Solved 200+ DSA problems on LeetCode, HackerRank, CodeChef and Codeforces.

Leadership: Co-Convenor, Social Media Team, VTU FEST (2025–Present), coordinating a 15-member team.

Hackathons: HackBites 3.0; TECHNOCOGNITION'25 (24-hour and 36-hour).
